

Exercise 9

Page "Basket"

Implement functionality on the click event of the button "delete marked books".

- Create a stored procedure to delete books from the table ShopCart.
- If a checkbox is marked, run the created stored procedure and reload the page.

Page "Web sitemap"

Create a sitemap by appropriate controls.

Page "Admins"

Create a list of all available books providing the following functionality - editing, deleting, adding a book, uploading a book picture in BookPictures folder in the project. Use the appropriate controls - *DetailsView* , *FileUpload*, *Button*, *Label* ...

Списък Книги	
Книга №	DB111
Тип на книгата	Database
Заглавие	Oracle Database
Автор	K. Loney
Описание	Get thorough coverage of Oracle Database 10g from the most comprehensive reference available, published by Oracle Press. With in-depth details on all the new features, this powerhouse resource provides an overview of database architecture and Oracle Grid Computing technology, and covers SQL, SQL*Plus, PL/SQL, dynamic PL/SQL, object-oriented features, and Java programming in the Oracle environment. You'll also find valuable database administration and application development techniques, plus an alphabetical reference covering major Oracle commands, keywords, features, and functions, with cross-referencing of topics.
